TERMS AND CONDITIONS OF SALE

Terms and conditions of sale are as shown in our Camellia Catalog.

NEW AZALEAS

FASHION. (M). A wonderful new dwarf red, with orange-salmon overtones, and extremely vigorous, compact growth. Hardy.

(Sizes A, B, D, F.)

LADY HELEN. (M). The white sport of Mardi Gras that everyone has been waiting for. Same compact, spreading growth as the "grandparent", Pride of Mobile, with beautiful large white blooms that have green throats. Hardy for Deep South only.

(Sizes A, B, D, F, G, H.)

MARDI GRAS. (M). Our own introduction of a few years back, still in tremendous demand. A light silvery pink sport of Pride of Mobile, with deep red throat. Hardy for Deep South only.

(Sizes A, B, D, F, G, H.)

SHERWOOD RED. (M). Large, bright red blooms on this vigorous, hardy, semi-dwarf variety make it a fine addition to our list.

(Sizes A, B, D, F, G.)

SHERWOOD CERISE. (M). A wonderful addition to our list, with lighter blooms than Sherwood Red, about the color of Pride of Mobile. Hardy, semi-dwarf.

(Size F only).

MRS. G. G. GERBING. (M). This is the white sport of George L. Taber, with the same excellent growth. Hardy for Deep South only.

(Sizes A, B, D, G.)

PRICES OF ALL VARIETIES ON PAGE 5

THIS LIST EFFECTIVE OCTOBER 15, 1962

AZALEAS

Azaleas fall under the generic head **Rhododendron** and are cousins of the "true" **Rhododendron**. There are many different kinds. Some are suitable only to the lower South, while others are hardy as far north as the New England states. They comprise many different types of growing habits, ranging from the slower growing Kurumes often called "dwarf" Azaleas, to the Hardy Japanese and Indica types which sometimes attain a height of 10 to 12 feet. The hardiness of each type, and its growing habits are discussed under individual group headings.

INDICA AZALEAS

The **Indica Azalea** blooms are very large and single and the varieties presented here offer a wide range of colors. Indica Azaleas will exist in soils which are not as well drained as demanded by Kurumes but they will do better in well-drained soils. They are at home in the acid coastal soils and there are bushes over one hundred years old in Mobile, Charleston, and other coastal areas, with a spread of more than 25 feet in diameter. They are doing well apparently without any special attention, and are a living illustration of how perfectly at home they are in the coastal areas of the South.

ELEGANS. (Very E). Light Pink. Upright and fast grower. Earliest of our well-known Indica varieties.
(Sizes A, B, D, F, H.)

FIELDER'S WHITE. (E-M). These early, White blossoms provide an effective contrast to other varieties in group plantings. The compact growth and large flowers make it one of the best Whites.
(Sizes A, B, D, F, G, H.)

FISHER'S PINK. (M). This light Pink variety blooms rather later than **ELEGANS**, providing a light-colored bloom to blend with the **PRIDE OF MOBILE**.
(Sizes A, B, D, F, H.)

FORMOSA. (M). This vigorous and hardy grower, with its large, Purple-Rose flowers and dark leaves, is a favorite for background and screen plantings.
(Sizes A, B, D, F, G, H.)

GEORGE L. TABER. (M). The flesh Pink blooms with their delicate deep pink markings make this hardy, fast-growing, mid-season bloomer outstanding among the newer varieties.
(Sizes A, B, D, F, G, H.)

INDICA ALBA. (M). Inclined toward upright growth, the pure White flowers in mid-season are striking against the dull colored hairy foliage. Hardy.
(Sizes A, B, D, F.)

LAVENDER LIGHT. (Very E). An early blooming variety, this kind has a more delicately colored lilac bloom than **ELEGANS**, but otherwise is similar.
(Sizes A, B, D, F.)

MOSS POINT RED. (L). Light orange-red flowers appear after most other varieties have finished blooming. Resistant to petal blight. Very compact, with dark green foliage.
(Sizes A, B, D, F, G, H.)

PRESIDENT CLAY. (E-M). Orange Red, with good upright growth.
(Sizes A, B, D, F, G, H.)

PRIDE OF DORKING. (L). These clustering, Deep Wine Red blossoms provide a new thrill late in the season. A slow grower, it is not one of the hardiest.
(Sizes A, B, F.)

PRIDE OF MOBILE. (M). This practically perfect mid-season bloomer, with its mass of deep, watermelon pink flowers, and hardy, fast compact growth, defies dequate description. Originally called ELEGANS SUPERBA.

(Sizes A, B, D, F, G, H.)

PRINCE OF ORANGE. (M-L). A low, very bushy grower, this mid-season to late bloomer is a nice shrub even without its exotic, deep orange-red flowers.

(Sizes A, B, H.)

SALMON. (LAWSAL DAPHNE SALMON, PRIDE OF SUMMERVILLE). (M). This hardy, rather slow grower is very popular with its mid-season salmon-colored blooms.

(Sizes A, B, D, F, G, H.)

SOUTHERN CHARM. (JUDGE SOLOMON). (M). An excellent newer variety, with deep pink blooms. It is a sport of FORMOSA and has the same excellent growth habits.

(Sizes A, B, D, F, G, H.)

HARDY JAPANESE AZALEAS

This group of Kaempferi, Macrantha, and other hardy Azaleas can be grown over a large part of the United States, being very much at home in New England where some are deciduous.

APPLE PINK. (L). This is a local name given by us to a variety whose identity has been lost. It is extremely vigorous, really semi-dwarf, with salmon-rose double blooms coming late in the season.

(Sizes A, B, D, F, G, H.)

FESTIVE. (E). Single white with flecks and stripes of rose. Dwarf.

(Sizes A, B, D.)

FLAME. (E). Fast, upright grower, with bright orange-red single flowers. Actually a Kurume variety, but placed in this group because of its growth habit.

(Sizes A, B, D, F, G, H.)

KAEMPFERI. (L). Evergreen in the South, this Azalea loses its leaves farther North. It has large, single red flowers. Hardy to Massachusetts.

(Sizes A, B, D, F, G.)

LILACINA. (M). Very delicate lilac color, with delightful fragrance and good growth, hairy leaves.

(Sizes A, B, D, F.)

MACRANTHA DOUBLE. (L). Large, clear pink double flowers. The Macrantha varieties are very late, extending the Azalea season in this area to May and June.

(Sizes A, B, D, F, G.)

MACRANTHA ORANGE. (L). Orange-red single flowers, with slow dwarf growth and excellent evergreen foliage. Blooms weeks after most Azaleas have finished.

(Sizes A, B, D, F, G, H.)

MAXWELLI. (M-L). This variety is the equal of the Indicas in dense growth habit and large size blooms, yet is much hardier. Carmine-red single flowers.

(Sizes A, B, D, F, G.)

TREASURE. (M). A Glenn Dale Hybrid with single white blooms, vigorous growth.

(Sizes A, B, D, F.)

WAKAEBISU. (L). Large hose-in-hose, bright salmon pink. An outstanding, prolific late Azalea. Dwarf.

(Sizes A, B, D, F.)

WAKAMATSU. (L). Very large flower of delicate purple, often hose-in-hose. Dwarf.

(Sizes A, B, D, G.)

4-gal. (Size H) and 2-gal. (Size G)

BELTSVILLE AZALEAS

This group of Azaleas, developed at the United States Department of Agriculture experiment station at Beltsville, Maryland, is one which shows great promise toward broadening the selection of kinds to those in the colder areas.

H. H. HUME (No. 244). This is a hybrid obtained from the cross **INDICA ALBA** x **SNOW**. The plant is moderately branched, erect-spreading with foliage partially persistent, depending on temperatures encountered. Flowers are white, with a faintly yellowish throat, hose-in-hose; and are considerably larger than **SNOW**, being 2 inches across. They are borne 2 to 5 per cluster. Hardy in New England and making an especially fine plant in the South, Southeast, and in California. It is also acceptable as a greenhouse forcing variety.
(Sizes A, B, D, F, G.)

IRMA. (M). Purple hose-in-hose blooms in clusters of three. Dwarf.
(Sizes A, B, D, F.)

Size D is supplied either in quart oil can
or coffee can

KURUME AZALEAS

Kurume Azaleas are slow growing, sometimes called "dwarf," and are often seen in borders along walks and in planting around or in front of larger Azaleas, in rock gardens, and in beds. They are adapted to a great variety of uses. Kurumes will eventually reach a height of 4 to 6 feet, however, unless kept pruned back. They are hardy all over the South and as far north as New Jersey and Long Island. Extensively used by florists as pot plants, and in the North they bloom for them at Easter time. The individual blooms are small in comparison to the individual blooms of the Indicas, but the Kurume blooms are borne in greater profusion and in clusters. Some blooms are single, while others have two rows of petals and are described as "hose-in-hose." You will note the wide range of colors.

CHRISTMAS CHEER. (E-M). Small, bright red hose-in-hose blooms; compact growth.

(Sizes A, B, D, F, G.)

CORAL BELLS. (M). Dainty hose-in-hose coral pink blooms, shading deeper toward center. Small, glossy leaves, vigorous growth.

(Sizes A, B, D, F, G, H.)

DOUBLE MAUVE. (M-L). Mauve is a delicate shade of violet or lilac. Beautiful hose-in-hose blooms cover entire plant.

(Sizes A, B, D.)

HEXE. (M). Deep crimson red hose-in-hose blooms, somewhat larger than CHRISTMAS CHEER. Compact growth. Probably a Kurume hybrid.

(Sizes A, B, D, F, G, H.)

HEXE DE SEFFELAERE. (M). A Belgian hybrid variety (Prof. Wolters x Hexe), it is an improved type of HEXE with perhaps more vigorous and upright growth.

(Sizes A, B, D, F, G.)

HINO CRIMSON. (M). Similar to HINODEGIRI, with very rapid growth.

(Sizes A, B, D, F.)

HINODEGIRI. (M). One of the most popular reds. Very compact grower and covers itself with showy bright red single blooms. One of the most sought after for pot plants and borders.

(Sizes A, B, D, F, G, H.)

HORTENSIA. (M). Large hose-in-hose soft pink blooms, produced in large trusses.

(Sizes A, B, D, F.)

PEACH BLOW. Fast grower, with medium size single flowers of delicate peach pink shade.

(Sizes A, B, F, G, H.)

PINK PEARL. (M). Salmon-rose shading lighter toward center. Large hose-in-hose blooms, produced in clusters. Rapid growth.

(Sizes A, B, D, F.)

SALMON BEAUTY (M). Large hose-in-hose salmon pink blooms, with large, glossy light green leaves. Compact growth.

(Sizes A, B, D, F, G, H.)

SALMON QUEEN. Fast grower, with medium size single flowers of delicate peach pink shade.

(Sizes A, B, D, F, H.)

SNOW. (M). Pure white hose-in-hose blooms in clusters. Good size glossy leaves, low compact growth.

(Sizes A, B, D, F, G, H.)
